OKETAYOT EMMANUEL KISEMBO

Gulu, Uganda | +256 782 761 164 | okettaemma1@gmail.com | linkedin.com/in/oketayot-emmanuel-kisembo-2bb05841b

PROFESSIONAL PROFILE

Information Systems student at Kyambogo University with hands-on software development experience from an internship at LAPOK Ventures. Built a role-based distribution management system in PHP/MySQL, developed the company's e-commerce website, and audited a point-of-sale platform. Also contributed to a full-stack Next.js/Node.js application as an invited collaborator with KumaloTech; currently studying Linux systems administration and networking alongside coursework. Seeking a junior software engineering role.

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, React, Next.js (project-level)

Backend & Databases: PHP, Node.js (project-level), MySQL, SQL, relational schema design, REST-style API integration

Tools: Git, GitHub, Visual Studio Code, Microsoft Excel

Infrastructure & Networking: Domain, DNS and hosting management; Linux and SSH fundamentals (current coursework); TCP/IP networking (CCNA)

EXPERIENCE

IT & Software Development Intern — LAPOK Ventures Company Limited — Gulu, Uganda

22 June – 26 July 2026

- Built and maintained a PHP/MySQL distribution management system (DMS) with a 14-table schema, session-based authentication, and role-based access control across six user roles (Admin, Manager, Accountant, Field User, Driver, Cadet).
- Added stock delivery tracking and a manager-approval edit-request workflow; wrote seed data and a diagnostic script for testing.
- Hosted the DMS live at dms.afriboards.com and presented it to Coca-Cola company executives and the client's board.
- Built the company's product catalogue and WhatsApp-based bulk-ordering website, live at lapok.afriboards.com, using HTML, CSS and JavaScript, including a promotions engine, per-SKU slideshows, discount logic, and SEO/mobile-responsiveness improvements.
- Managed hosting and domain infrastructure: coordinated a domain transfer between registrars and set up company email and Google Groups.
- Audited a partner lodge's Weltraum POS/PMS system and produced a findings-and-recommendations report for management.
- Built Excel-based systems for stock control, requisitions, daily revenue balancing and staff records, used day-to-day by depot and lodge staff.

ACADEMIC & PERSONAL PROJECTS

Kumalo — KumaloTech (invited collaborator) — Next.js, Node.js, Database

- Contributed to a company-built full-stack platform (private repository), working on the Next.js frontend and Node.js API within a professional team codebase.

Personal Portfolio Website — React

- Built a React-based portfolio site showcasing project work.

SmartFix IT Solutions (Group Project) — PHP, MySQL, JavaScript

- Contributed to a computer-repair booking website; built and presented the database connection and user registration module.

Enterprise Inventory Management System (Group Project) — Oracle Database

- Designed the ER diagram, relational schema and key design decisions for an Oracle-based inventory system; presented on demo day.

EDUCATION

Bachelor of Information Systems (BIS) — Kyambogo University
2024 – Present | CGPA: 3.99 / 5.0
Relevant Coursework: Database Systems • Web Design and Development • Computer Networks and Data Communication • Business Process Analysis and Modelling • Research Methods

Uganda Advanced Certificate of Education (UACE) — Bishop Cipriano Kihangire Secondary School, 2023
Uganda Certificate of Education (UCE) — Ocer Campion Jesuit College, 2021

CERTIFICATIONS

- Cisco Certified Network Associate (CCNA) — Cisco Networking Academy
- Networking Fundamentals Certificate — Cisco Networking Academy
- Data Analytics Essentials (in progress) — Cisco Networking Academy
