PROFESSIONAL PROFILE

Information Systems student at Kyambogo University with production software experience from LAPOK Ventures and a current sales and presales internship at Mitsumi Distribution. Built a role-based distribution management system in PHP/MySQL, shipped a live catalogue and WhatsApp ordering site, and audited a POS platform. Also contributed to a full-stack Next.js/Node.js platform with KumaloTech. Currently working the Veeam data-protection portfolio and earning Veeam University Partner badges across sales and technical tracks.

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, React, Next.js (project-level)

Backend & Databases: PHP, Node.js (project-level), MySQL, SQL, relational schema design, REST-style API integration

Data Protection: Veeam backup and recovery fundamentals, VUL licensing, cyber resilience, VMware/Broadcom licensing research

Infrastructure & Networking: Linux and SSH fundamentals, TCP/IP and CCNA networking, domain/DNS/hosting management

Tools: Git, GitHub, Visual Studio Code, Microsoft Excel

EXPERIENCE

Sales & Presales Intern — Veeam Data Protection

Sep 2026 – Present

Mitsumi Distribution (Devjyot Traders) · Kampala, Uganda

- Work the Veeam data-protection portfolio across East and West Africa, supporting partner campaigns, licensing research and customer-facing messaging for backup, recovery and cyber resilience.
- Built a partner-facing email campaign that maps Veeam capabilities to customer risk instead of opening with a product catalogue.
- Researched Veeam licensing (VUL), VMware/Broadcom subscription changes and the wider vendor line card, including Barracuda, Fortinet, Veeam, Commvault and VMware.
- Earned nine Veeam University Partner 2026 badges: five VSP (sales) and four VMTS (technical) across cyber resilience, SaaS/cloud, Kubernetes, DR and provider delivery.

IT & Software Development Intern

22 Jun – 26 Jul 2026

LAPOK Ventures Company Limited · Gulu, Uganda

- Built and maintained Outpost, a multi-depot PHP/MySQL distribution management system with a 14-table schema, session authentication and server-enforced roles (Admin, Manager, Accountant/RDC, Cadet), covering stock taking, dispatch, cash handover and PDF reporting; live at dms.afriboards.com.
- Built the company catalogue and WhatsApp bulk-ordering site at lapok.afriboards.com using HTML, CSS and JavaScript, including a promotions engine, per-SKU slideshows and mobile/SEO improvements.
- Added stock delivery tracking and a manager-approval edit-request workflow; wrote seed data and a diagnostic script for testing.
- Managed domains, DNS, hosting and company email; audited a partner lodge's POS/PMS system and produced a findings-and-recommendations report.
- Presented Outpost to Coca-Cola executives and the client's board; built Excel systems for stock control, requisitions, daily revenue balancing and staff records.

ACADEMIC & PERSONAL PROJECTS

Kumalo — KumaloTech (invited collaborator) Next.js · Node.js

- Contributed to a company-built full-stack platform (private repository), working on the Next.js frontend and Node.js API within a professional team codebase.

Personal Portfolio Website HTML · CSS · JavaScript

- Built a responsive portfolio with dark mode, scroll interactions and a scripted Q&A assistant; live at ekiz538.github.io.

SmartFix IT Solutions (Group Project) PHP · MySQL · JavaScript

- Built and presented the database connection and user registration module for a computer-repair booking site, including validation, duplicate-account handling and secure credential storage.

Enterprise Inventory Management System (Group Project) Oracle Database

- Designed the ER diagram, relational schema and key normalisation decisions for an Oracle-based inventory system; presented on demo day.
